

## EXPLORERS, I NEED YOUR HELP FOR MY STUDY!

Hi, my name is Athina Georgiou Shippi and I need your help. I am a student at the Edinburgh School of Architecture and Landscape Architecture at University of Edinburgh. I am trying to understand what might influence someone's environmental attitudes and behaviour.

### HOW CAN YOU HELP ME?

You can help me by participating in four fun and interesting activities where you will discuss in a group, different topics.

Can you guess what these activities might involve from the pictures?

Some clues:

Experiences with places

Environmental Attitudes

Understanding Nature

Environmental Education

Contact with Nature

Environmental Behaviour

### HOW WILL THE RESULTS BE USED?

The results will be used to write a report for my degree completion and articles in magazines (journals) and conferences. Also, the key messages and findings of the study will be circulated to explorer leaders, and if you like to you as well.

### HOW WILL THE INFORMATION BE STORED?

Your name will only be used to keep a record of the consent forms. You will be allocated a reference number ensuring your anonymity is kept. Only I will have access to the non-anonymised documents which will be stored separately from the anonymised documents.

### WHAT TO DO NOW?

If you are interested in helping me with this study, please let your parent/guardian know so that they can contact your explorer leader.

**★ You will be able to participate in the study activities ONLY if you have a signed consent form from your parent/guardian.**

If you have any questions, you can contact me through your explorer leader.
